This electric steam table is a simple solution to display your most popular food options. It features a 18 gauge stainless steel construction with a built-in cutting board and an undershelf for extra storage. It is intended for dry use, which allows a cleaner work surface, longer lasting elements and easier operation. Moreover, it features independent regulators to control temperature, letting you customize to your needs. Compartments are fully insulated and will not rust or crack. It is an ideal unit for catering services or buffet to keep all your food items consistently warm and ready to serve. It is designed to provide excellent value while delivering exceptional results.
